Feedback Implementation

1. Sitemap Correction: The linear sitemap has been replaced with a visual hierarchical sitemap (Figure 1 below). The structure shows Home as parent with four child pages, About, Menu, Gallery, Enquiry/Contact. All pages are accessible from Home. Brand colour #4B2E17 applied and geographic context of Cape Town, South Africa included.
2. HTML Implementation: Implemented 6 semantic HTML5 pages, `index.html`, `about.html`, `menu.html`, `gallery.html`, `enquiry.html`, `contact.html`. Each page uses ``, ``, ``, `

`, `` and consistent navigation.
3. GitHub Best Practice: Added multiple descriptive commits: "Add complete HTML structure", "Add CSS external stylesheet", "Implement responsive design with media queries", "Add sitemap and responsive screenshots to README". Full changelog maintained in <http://README.md>.

External Stylesheet Linking

An external stylesheet was created at `css/style.css` and linked to all HTML pages in the ``:

```
<link rel="stylesheet" href="css/style.css">
```

Base Style & Typography

- CSS Reset: `{margin:0; padding:0; box-sizing:border-box; }`
- Colour Scheme: Primary #4B2E17 (Dark Roast), Secondary #FFF8E1 (Cream), Accent #C8A27E (Latte)
- Fonts: Google Fonts - Poppins for headings, Open Sans for body
- Typography: `h1 {font-size:2.5rem; font-weight:700; letter-spacing:1px;}` `p {font-size:1rem; line-height:1.6; letter-spacing:0.5px;}`

Layout & Visual Enhancement

- Layout: Navigation using Flexbox `display:flex; justify-content:space-between;` Menu items using CSS Grid `display:grid; grid-template-columns: repeat(3, 1fr); gap:20px;`
- Visual: Buttons with hover `a: hover {background:#C8A27E; transition:0.3s;}` Cards with `box-shadow: 0 4px 8px rgba(0,0,0,0.1);`
- Debugging: Chrome DevTools used to inspect box model, fine-tune padding/margins (See Figure 2).

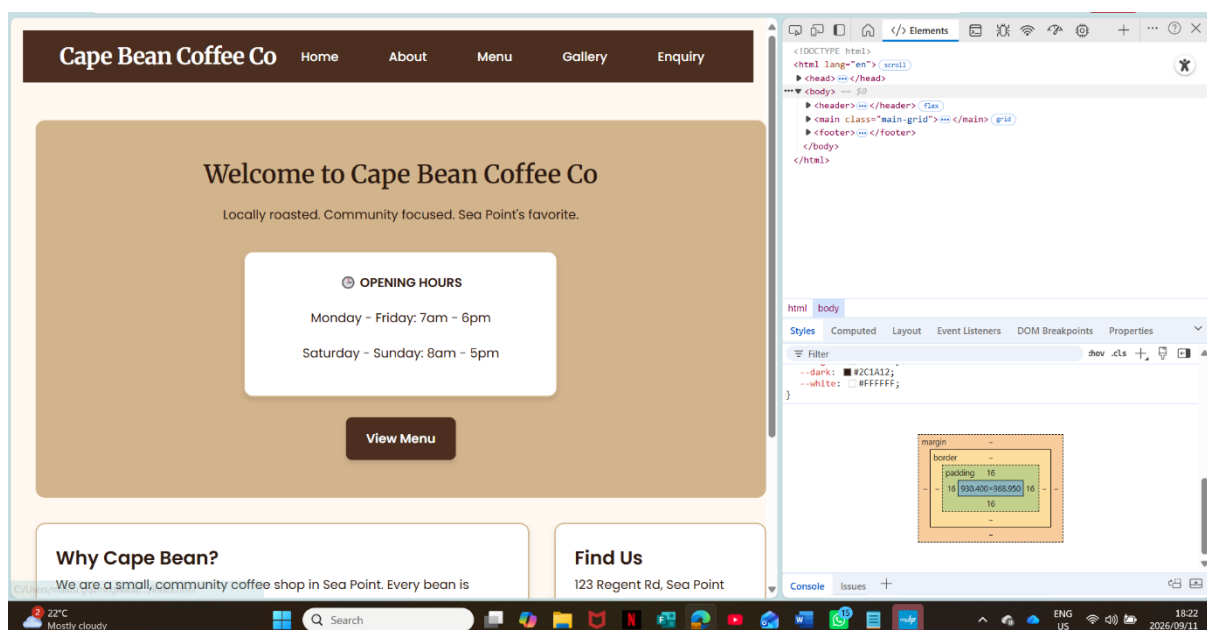

Figure 2: Chrome DevTools used for CSS debugging.

Responsive Design [NEW]

Responsive Techniques

1. Breakpoints: `@media screen and (max-width: 768px) { nav{flex-direction:column;} .menu-grid{grid-template-columns:1fr;}}` and `@media (max-width:480px)` for mobile.
2. Relative Units: All fonts in `rem`, widths in `%` and `em`, not fixed `px`.
3. Responsive Images: All `<img>` tags use `alt` text, and `srcset` + `sizes` attributes: ``
4. Testing: Tested on Desktop (1920px), Tablet iPad Air (820px), and Mobile iPhone XR (414x896) using Chrome DevTools Device Toolbar.

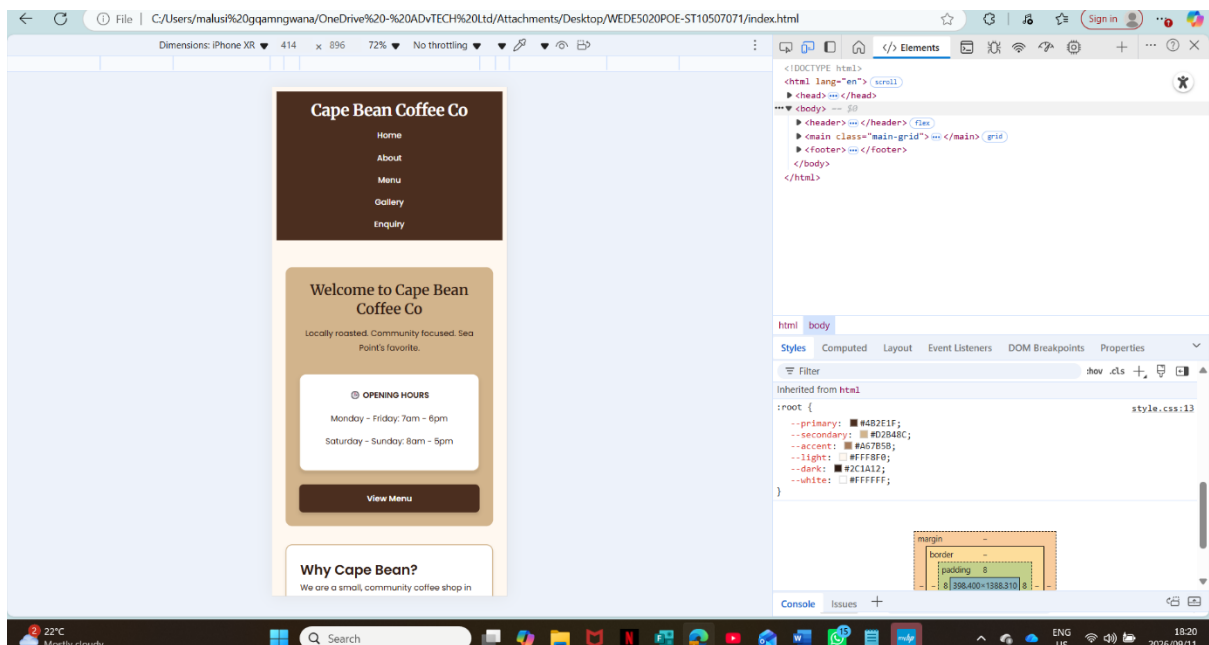

Figure 3: Mobile Responsive View - iPhone XR 414x896 - Navigation stacks vertically
